

Waimea Trails and Greenways

MEETING NOTES

May 8, 2006

PRESENT: Clem Lam, Peggi Kamisato, Lynn Taylor, Avi Okin, Keith Wallis, Margaret Willie

1. Magoon - County - Catholic Church - Kaz to follow up on - May 17 to see if it has been completed.
2. The surveyor said last month he would be done with the State parcels and Parker Ranch parcels in a month - can Kaz check up with him to see if he is done so we can move to the next phase?
3. Lalamilo Research Station - Greg clarified the status of this with regards to Waimea Trails and Greenways - we have an approval to seek and easement for the trail, we need to comply with certain conditions - survey and metes and bounds description of the trail then apply to the State for the actual conveyance of the easement. We do not have the right to enter onto or do work within the LRS at this time.
Clem walked with Milton Yamasato last week Thursday to show him where the trail will be going, He was very disappointed to see the work we had done on the trail and does not want people using any trail in the LRS at this time.
Ben Discoe was planning a work day Saturday May 6 at the Lalamilo Research Station and moved his work area to Carter Center and the County land behind Magoon's.
4. Saturday we had a work day where we cleared debris from the trail at Carter Center and County behind Magoon's. 4 people showed up but we left a nice looking foot path.
- 5, Margaret Willie came to the meeting to share some research she has done on a Waimea mini bypass. She said Parker Ranch is trying to forestall the bypass around their development until they develop all the area out to the eventual bypass. She has talked to the Planning Department who was going to approve lifting the requirement that they build the mini bypass until she investigated. They now are going to defer action until further discussion.
