

# Waimea Trails and Greenways

## MEETING NOTES

May 10, 2010

PRESENT: Clem Lam, Peggi Kamisato, Avi Okin, Leningrad Elairionoff,  
Margaret Willie

1. Last week Margaret presented several options to Parker Ranch to agree to in lieu of opening the connector road as originally required by May 8, 2010.
2. One of those options is to provide fencing materials and to allow the fence required between Kahawai Street and the Lalamilo Research Station to be installed on the south (Parker Ranch ) side of the stream to satisfy the requirement in the Easement documents for the Waimea Trails and Greenways.
3. The location and installation of the fence on the Parker Ranch side of the stream would be a great benefit to the trail and would allow the WT&G Committee to have their community work day to build and start using a temporary trail between Opelo Road and Kahawai Street.
4. The committee members unanimously agreed to approve this request to Parker Ranch. We will have to make sure that we are in line with the provisions of the Richard Smart Grant.
5. Our last work day was September 2008. We would have this new workday in September if the fence were installed prior to that.
